PROJECT LOGO

Problem Statement

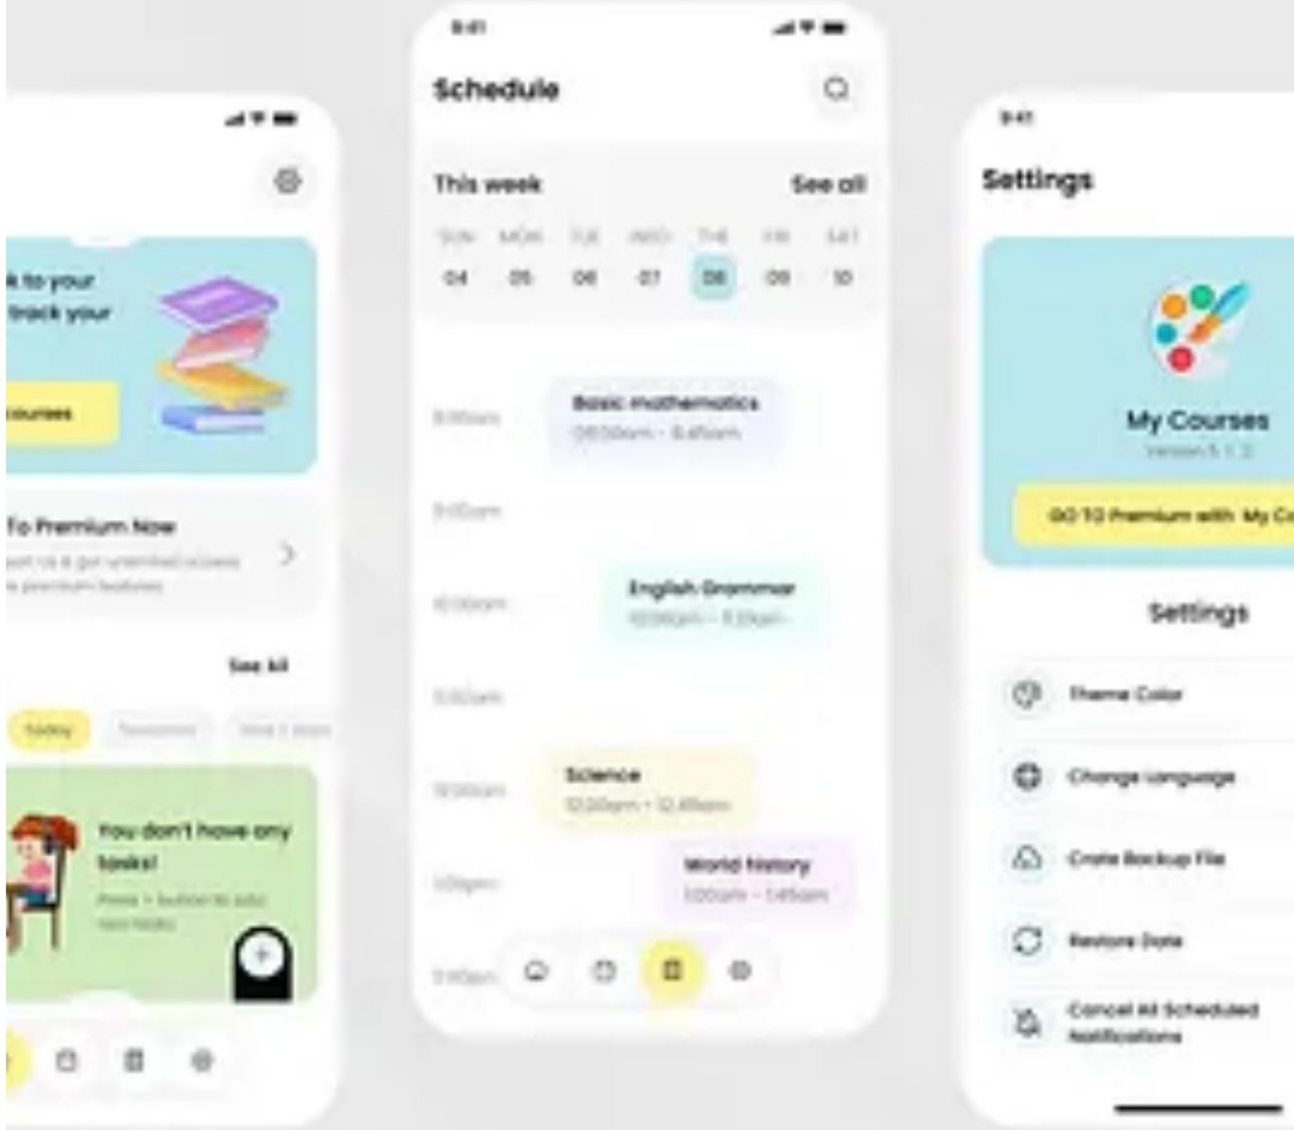
- Students struggle to manage multiple subjects simultaneously.
- Lack of a structured and personalized study planning system.
- Real-time progress tracking is often unavailable in traditional tools.
- Absence of smart AI-driven testing to validate learning.
- Urgent need for an automated, adaptive study assistant.

Project Objectives

- Develop a smart, AI-integrated study planner.
- Generate automatic, optimized study timetables.
- Implement AI MCQ test validation for each subject.
- Track student progress with visual analytics.
- Enhance consistency through a study streak system.
- Provide a motivational dashboard for daily inspiration.

Proposed System

- **Personalized Portal:** Secure Login/Signup system for data persistence.
- **Smart Dashboard:** Daily quotes and task summaries.
- **Intelligent Input:** Difficulty-based subject configuration.
- **AI Timetable:** Exam-date synchronized schedules.
- **Validation:** AI-generated MCQ tests post-task completion.
- **Analytics:** Streak systems and visual progress trackers.



System Modules

Authentication

Secure login and signup functionality for users.

Dashboard

Central hub for motivational quotes and overview.

Subject Input

Module to capture subject names and difficulty levels.

Timetable Gen

AI-driven logic to create schedules based on exams.

Task Tracker

Completion marking and status update module.

AI MCQ Test

Dynamic question generation via AI API.

Progress Analytics

Visual representation of completed vs pending.

Reset/Restart

Ability to wipe data and start a new study cycle.

System Workflow

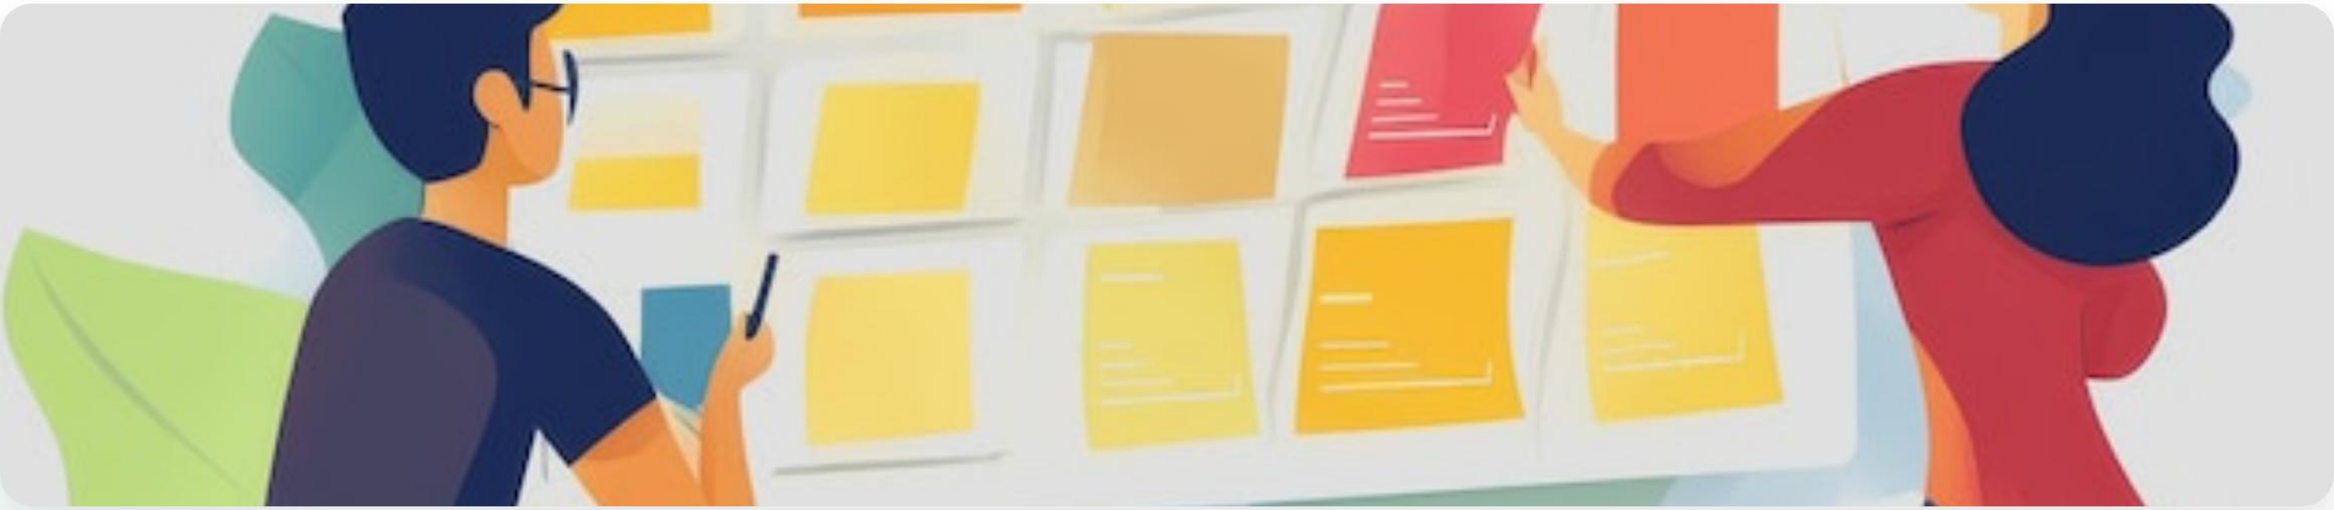
Step 1
User Login / Registration

Step 2
Subject & Exam Date Input

Step 3
AI Timeline Generation

Step 4
Task Completion & Streak

Step 5
AI MCQ Test & Progress



Key Features

Smart AI Planner

Automatic timetable generation tailored to individual subjects.

Dynamic Configuration

Input based on subject difficulty and available study hours.

AI-Powered Testing

Automatic MCQ generation to validate learning milestones.

Study Streaks

Gamified consistency tracking to keep students motivated.

Visual Progress

Live progress bars for pending and completed tasks.

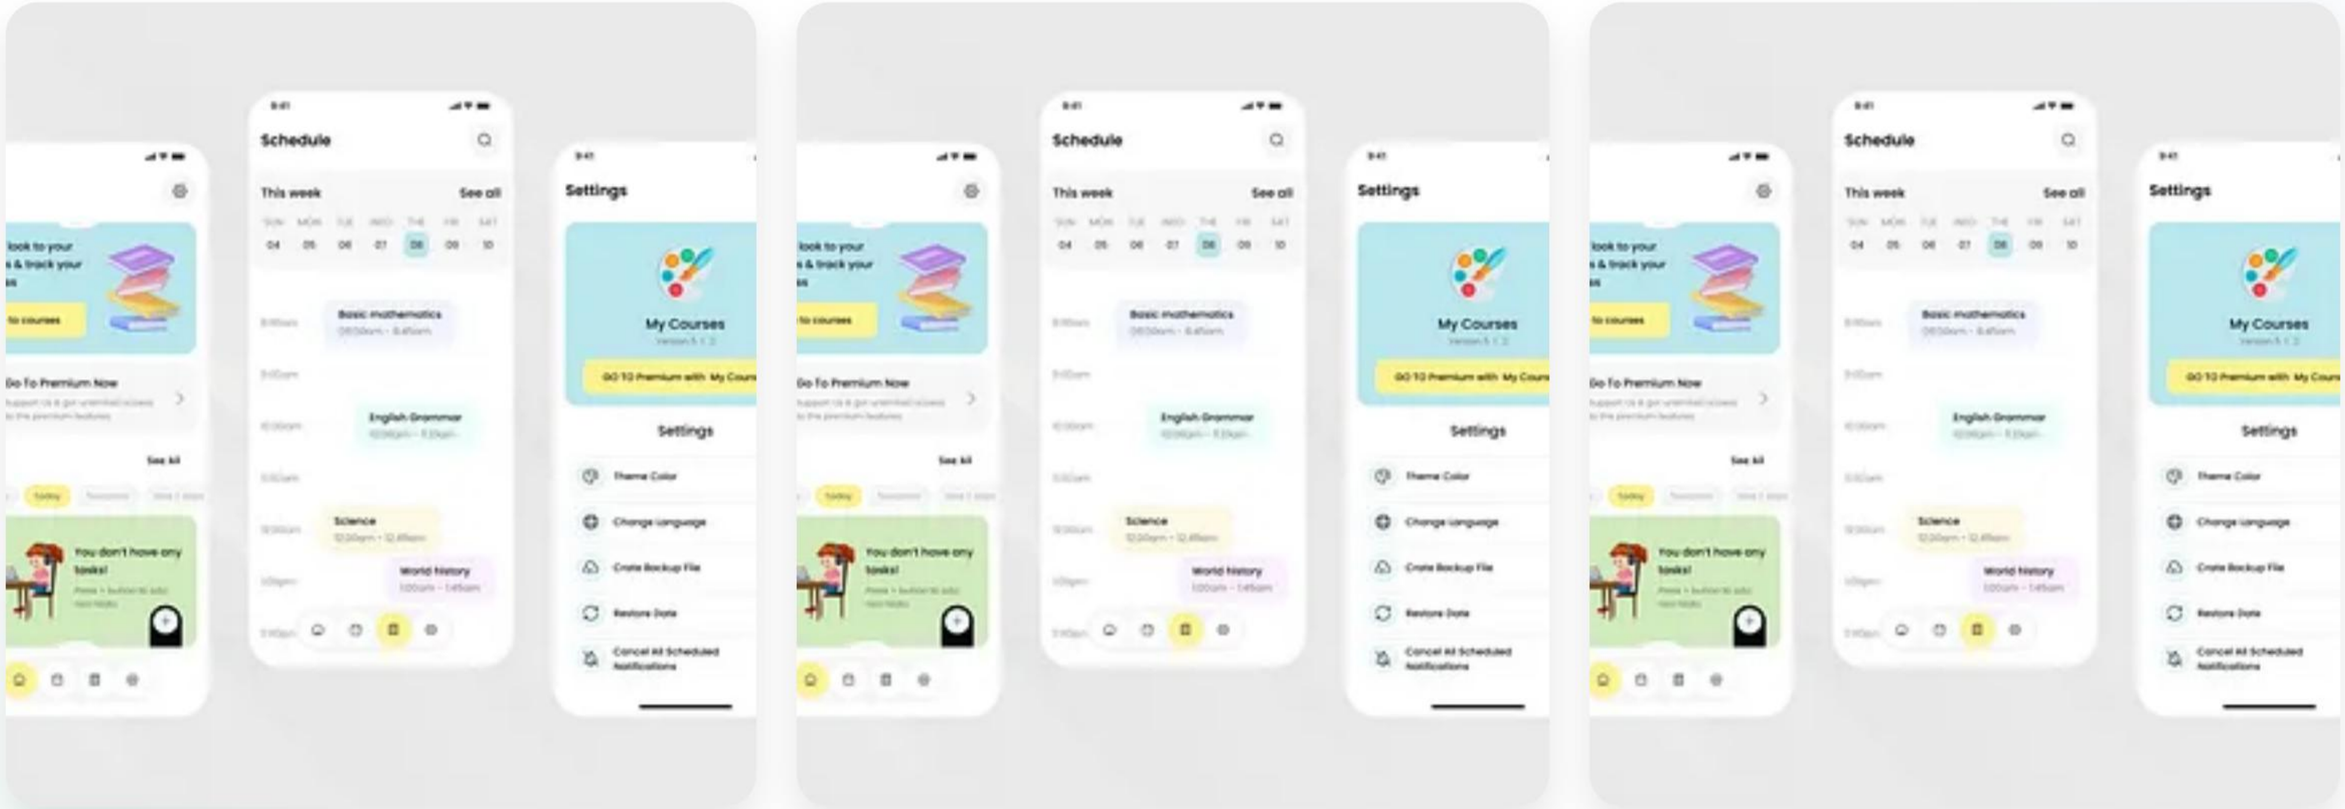
Daily Motivation

Fresh motivational quotes displayed upon every dashboard refresh.

Technology Stack

- **Frontend:** Modern HTML5 & CSS3 for responsive UI.
- **Logic Layer:** JavaScript (ES6+) for dynamic behavior.
- **Storage:** Local Storage API for client-side data persistence.
- **AI Engine:** Integration via AI REST APIs for MCQ and planning.
- **Design:** Responsive CSS Flexbox and Grid layouts.

System Output Screens



Advantages of pLANWISE

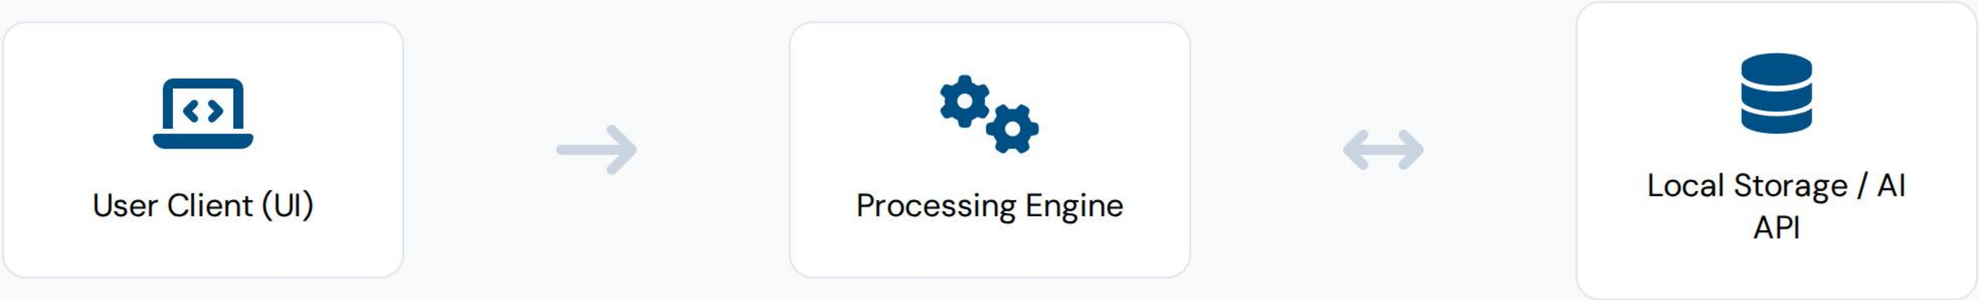
- Saves significant study time
- Improves overall productivity
- Real-time performance tracking
- User-friendly responsive interface

Future Roadmap

Future Technology Roadmap

- Mobile Application version (Android/iOS).
- Centralized Cloud Database integration (Firebase/MongoDB).
- Push notification reminders for study sessions.
- Advanced AI analytics for predictive failure detection.
- Auto-generation of performance PDF reports.

System Architecture



The system follows a decoupled architecture where the Frontend communicates with LocalStorage for state and external AI APIs for intelligent processing.

Conclusion

- **Successfully Developed:** A robust AI-based study planner application.
- **Efficiency Achieved:** Automatic timetable generation significantly reduces planning overhead.
- **Validation Implemented:** AI MCQ tests provide an immediate feedback loop for students.
- **Tracking Integrated:** A comprehensive progress and streak system ensures student accountability.
- **Academic Value:** Provides a scientific approach to exam preparation and daily study habits.
